

Report to MD6 Council
Ensign Skills Center
January 21, 2017

We at the Ensign Skills Center are thrilled to be in our 15th year of service. Each year we see more patients, help more families, and provide valuable resources for our low vision community members. This year, like many years, we have big dreams. We dream of a Board of Directors that has a Board member from every Colorado Lions District. We dream of an endowment fund that will help Ensign transition to the needs of the future. We dream of working to bring low vision services to every part of this great state of Colorado. We dream big because we know that we provide a vital service. Low vision is impacting our friends, our families, ourselves. The only option that we have is to take charge, adapt, and live our lives to the fullest. So find the help you, your family or friends need today by contacting the Ensign Team.

Ensign provides services at many locations throughout Colorado. Contact Ensign to locate the closest office to you.

Our Onsite Services to individuals in retirement, assisted living and senior centers continue to expand and help individuals that cannot travel to our permanent sites.

District Governors, the Onsite program is available to all districts. Please consider arranging a visit of the Onsite Van to provide our low vision services to one or more communities in your district.

Respectively Submitted,
PCC Ron Lockner
