

# SIGHT PRESERVATION, AWARENESS, AND ACTION COMMITTEE REPORT

October 2016 Council Meeting

Dear CC Andy and Council of MD6 Governors,

Since the last Council Meeting, I published in the Mane Lioner Magazine an article titled “Defining Blindness and Blindness Alternative Techniques”. The article was a combination of two separate articles to help Lions explore who they consider to be blind as well as to educate them about how blind people function independently in the sighted world. October is Meet the Blind Month, October 12 is Lions World Sight Day, and October 15 is White Cane Safety Day. This is the perfect time to educate the public about blindness, conduct blindness prevention projects, as well as promote sight preservation and awareness.

My best to all,

Alice George  
Sight Committee Chairperson
